Gagan Warade
Senior Software Development Engineer in Test (SDET)

Mob: +91 9834021430 / 9404618107
E-Mail: gaganwarade77@gmail.com

Result-oriented SDET with 6+ years of experience architecting scalable automation solutions across Cyber Intelligence, Fintech, and Data Platforms. Expert in building robust frameworks from scratch using Python, Java, TypeScript, and JavaScript with Playwright, Selenium, WebdriverIO, and PyTest. Proven track record in modernizing legacy QA infrastructure, REST API automation, high-volume cloud data validation, and integrating continuous testing into DevOps CI/CD pipelines on AWS. Adept at leveraging GenAI-powered solutions to drive engineering productivity in Agile Scrum environments.

Core Competencies:

- **Automation Engineering:** Automation Architecture, Test Framework Design (from scratch), Custom Tool Development.
- **Testing Capabilities:** End-to-End (E2E), Functional, Regression, Integration, Sanity, Cross-Browser Testing.
- **API & Backend Automation:** REST API Validation, Backend Testing, Postman, SoapUI.
- **Data & Cloud Testing:** ETL Data Validation, Database Integrity Testing, Databricks Testing, Cloud-Native QA.
- **DevOps & AI-Assisted QA:** CI/CD Pipeline Integration, Pipeline-as-Code, AI-powered Testing Agents, PR Code Review Automation.
- **Process & Strategy:** Agile/Scrum Methodologies, Test Strategy & Planning, SDLC/STLC, Defect Lifecycle Management. Delivered POC for **ai-pr-auto-review** to automate code quality checks.

Skill set:

Programming Language	Python, Java, JavaScript, TypeScript, SQL.
Automation Tools & Libraries	Playwright, Selenium, WebdriverIO, PyTest, Cucumber (BDD), Gauge, SoapUI, Postman.
DevOps & CI/CD	Jenkins, Git, GitGub Actions, Bitbucket, AWS CodeBuild. Jira, Confluence
Cloud & Data Infrastructure	AWS (S3, EC2), Databricks, DBeaver, Linux, Windows.
AI & Productivity Engineering	Amazon Q, AI Agents, GitHub Copilot, Cursor AI, AI PR Review Automation.
Design Patterns & Frameworks	Page Object Model (POM), BDD (Cucumber), Data-Driven Testing, Keyword-Driven Testing.

Key Projects:

- Enterprise Banking Platforms
- Data Extraction
- Cyber Intelligence Platform

Professional Experience:

Cognyte | QA Software Developer in Test *2025- Present*

Projects: Vantage Platform & MCCX Integration (A high-stakes security hub used by government agencies for threat monitoring and complex cyber intelligence data analysis).

Key Responsibilities:

- Designed and scaled automated testing solutions for complex cyber intelligence applications, **improving overall test coverage**.
- Architected and integrated functional **Playwright (JavaScript/Java)** automation scripts for complex end-to-end workflows, mitigating critical regression risks.
- Developed and deployed custom **AI-powered agents** utilizing internal engineering documentation, drastically reducing manual engineering validation effort.
- Spearheaded a Proof of Concept (POC) for an **AI-powered Pull Request Review solution (ai-pr-auto-review)**, enhancing automated code quality checks within the **CI/CD pipeline**.
- Optimized automation framework stability by executing proactive defect analysis, resulting in a **reduction in pipeline flaky tests**.
- Collaborated closely with cross-functional Developers, QA, and DevOps engineers within fast-paced **Agile Scrum** sprints to ensure zero-defect production releases.

Technologies: Java, JavaScript, Playwright, AI Agents, CI/CD, Git, Jenkins.

CITCO | QA Software Development Engineer in Test (SDET) *2023 – 2025*

Projects: Enterprise Data Services & Databricks Migration (Centralized multi-line financial data hub supporting automated reporting and large-scale business data extraction).

Key Responsibilities:

- Engineered and implemented a highly scalable **API automation framework from scratch** using **Python** and **PyTest**, accelerating backend validation cycles.
- Automated complex, high-volume data ingestion pipeline validations within cloud-based **Databricks** environments, ensuring precise data streaming integrity.
- Built and maintained robust **Playwright** web UI automation test suites for enterprise-level financial reporting systems, reducing execution overhead.
- Executed comprehensive testing matrix including Unit, API, Integration, Regression, and Database Testing across dedicated **DEV** and **UAT** environments.
- Authored advanced **SQL queries** via **DBeaver** to perform deep-dive data validations, preserving end-to-end data quality.
- Integrated automated tests into **Jenkins-based CI/CD pipelines**, enabling continuous test-on-commit capabilities and increasing deployment confidence.

Technologies: Python, PyTest, Playwright, JavaScript, Databricks, AWS, Postman, DBeaver, SQL.

TIAA | QA Automation Tester *2020 – 2023*

Projects: Brokerage & Digital Retirement Platforms (Enterprise-scale digital retirement, pension management, and online stock trading platform).

Key Responsibilities:

- Designed, modernized, and stabilized web automation frameworks using **Selenium** and **WebdriverIO**, which **reduced regression execution time**.
- Successfully **migrated legacy Puppeteer and Protractor frameworks** to modern automated solutions, eliminating maintenance bottlenecks.
- Developed and maintained comprehensive automated API test suites using **SoapUI** and **Postman** for core financial web services.
- Analyzed JIRA user stories and business requirements to build highly reliable, reusable automated sanity and regression test scripts.
- Configured and managed **Jenkins CI/CD execution nodes** to trigger scheduled regression builds and generate instant QA metrics for stakeholders.
- Authored high-quality technical documentation and technical blogs to drive automation best-practices and smooth onboarding across global engineering teams.

Technologies: Selenium, WebdriverIO, Java, JavaScript, Cucumber (BDD), Jenkins, SoapUI, Postman, AWS CodeBuild.

Certification:

- **Generative AI & Implementation Mastermind** (2026)
- **AWS Certified Cloud Practitioner** (2025)
- **Python Programming Language Certification** (2024)
- **SAFe Agilist 5.1 Certification** (2022)

Education:

Bachelor of Engineer. (*The University of Pune***)** *2015– 2019*
